October 20, 2009

To Whom It May Concern:

On September 22, 2009, the Environmental Protection Agency issued its final version of the Green House Gases Reporting Rule. Beginning January 1, 2010, facilities that fall under this regulation must start to monitor the levels of green house gases. Those companies must report their findings to the EPA by March 31, 2011.

Martin Marietta Magnesia Specialties will comply with this regulation at both its Woodville OH dolomitic lime facility and its Manistee MI magnesia chemical plant.

However, Martin Marietta will not consider releasing the data for public disclosure until after our final report has been sent to the EPA by the March 31, 2001 deadline.

If you have any questions, please feel free to contact me.

Yours truly,

Vice President
