To Whom It May Concern:

As previously reported, Martin Marietta Magnesia Specialties LLC contracted with NOTOX BV in the Netherlands to be our "Only Representative" for matters regarding REACH.

We are pleased to announce that our magnesium hydroxide products have been officially registered with the European Chemical Agency under NOTOX.

The registration number is 01-2119488756-18-0001.

The registration date is October 19, 2010.

The quantity is over 1,000 tonnes per year.

The REACH SIEF for magnesium hydroxide submitted the chemical safety report stating that it is "not hazardous" and therefore is not "classified" under CLP. The European Chemical Agency must still approve the CSR for technical compliance.

Please contact Linda Rogers at 231-723 -1200 or me if there are any questions. If we receive any correspondence from ECHA, we will update this website

Mark T Wajer.

Submission date: 19/10/2010
Submission number: AZ908831-12
Decision number: SUB-D-2114149687-35-01/F

DECISION ON YOUR REGISTRATION UNDER REGULATION (EC) NO 1907/2006

Dear Sir/Madam,

In accordance with Article 20(2) of Regulation (EC) No 1907/2006 ("the REACH Regulation"), the European Chemicals Agency (ECHA) has concluded the completeness check of your registration dossier for Magnesium hydroxide. This registration by NOTOX B.V. OR1 includes:

- a substance in quantities over 1000 tonnes/year

The registration was considered complete.

The registration number for this registration: 01-2119488756-18-0001

The registration date for this registration: 19/10/2010

This registration entitles you to manufacture/import this substance (or, if relevant, use in the production of articles). If, however, you have been informed by ECHA that a previous registrant has requested a 4-month extension of your waiting period, you may only start to manufacture/import (or use) the substance 4 months from the date of this decision.

Please note that ECHA always informs registrants that:

- In accordance with Article 20(2) of the REACH Regulation, the completeness check ascertains that all the elements required and the fee payment has been provided. However, this completeness check does not include an assessment of the quality or the adequacy of any data or justifications submitted. Such an assessment may occur during a later stage in a compliance check.
- In accordance with Article 22(1) of the REACH Regulation, registrants are on their own initiative required to update their registrations without undue delay with relevant new information and submit them to ECHA in the cases described in this Article (for instance, change in status, substance composition or quantities).

Note that, if your IUCLID dossier did not include an EC number in section 1.1, REACH-IT will have automatically generated one because substances in dossier updates always have to be identified with the relevant EC number. In this case, before proceeding with an update dossier you have to export from REACH-IT the EC entry that has been created and import it into your IUCLID installation inventory. Failure to do so will result in your dossier being automatically rejected by the system. For detailed instructions on how to do this please consult 'Data Submission Manual 4' available at http://echa.europa.eu/help/help_docs_en.asp.
